

Announcement of
Cornell University-New York Hospital
School of Nursing
for 1943-44

525 EAST 68th STREET, NEW YORK 21, N. Y.

CORNELL UNIVERSITY OFFICIAL PUBLICATION

PUBLISHED BY CORNELL UNIVERSITY AT ITHACA, N. Y.

Monthly in September, October, and November
Semi-monthly, December to August inclusive

*[Entered as second-class matter, December 14, 1916, at the post office at
Ithaca, New York, under the act of August 24, 1912]*

CALENDAR

1943

Sept. 25	Saturday	Registration day (First-year students)
Sept. 27	Monday	First term begins
Oct. 12	Tuesday	Columbus Day—No classes except for first-year students
Nov. 25	Thursday	Thanksgiving Day—No classes
Dec. 25	Saturday	Christmas Day—No classes

1944

Jan. 1	Saturday	New Year's Day—No classes
Jan. 15	Saturday	Last day for filing applications for February class
Jan. 16	Sunday	First term ends
Jan. 17	Monday	Second term begins
Feb. 12	Saturday	Lincoln's Birthday—No classes
Feb. 22	Tuesday	Washington's Birthday—No classes
Feb. 28	Monday	Registration day (First-year students, February class)
May 7	Sunday	Second term ends
May 8	Monday	Third term begins
May 30	Tuesday	Decoration Day—No classes
July 4	Tuesday	Independence Day—No classes
July 15	Saturday	Last day for filing applications for September class
Sept. 4	Monday	Labor Day—No classes
Sept. 26	Tuesday	Commencement
Sept. 30	Saturday	Registration day (First-year students, September class)
Oct. 1	Sunday	Third term ends
Oct. 2	Monday	First term begins
Oct. 12	Thursday	Columbus Day—No classes except for first-year students
Nov. 23	Thursday	Thanksgiving Day—No classes
Dec. 25	Monday	Christmas Day—No classes

Term dates apply to September admissions. Adjustments necessary for February sections.

LOBBY OF NURSES' RESIDENCE

GENERAL STATEMENT

HISTORY

CORNELL University-New York Hospital School of Nursing has the resources of two great institutions of learning, both of which have a long history and an enviable record of achievement in the fields of education and public welfare.

Cornell University received its first endowment from the Federal Government's Educational Land Grant of 1862. The appropriation under the Morrill Act was to endow a college "where the leading object shall be . . . to teach such branches of learning as are related to agriculture and the mechanical arts." This was the beginning of a remarkable system of higher education. It, however, received its greatest impetus through the vision and generosity of Ezra Cornell who, under the influence of Andrew D. White, his colleague and later the first president, determined the form of the new University. In 1864 an agreement was reached with the Legislature of New York State which resulted in the founding of "a University of a new type, . . . an institution where any person can find instruction in any study." This combination of Federal, State, and private interests and resources is unique. It gives strength to the organization, broadens the aims and policies of the University, and extends the influence of its educational ideals.

It is interesting to note how one school after another has been organized and made a unit of this educational system, the most recent of which is the School of Nursing which was added in July, 1942.

The school, known until recently as The New York Hospital School of Nursing, was organized in 1877 as an integral part of The New York Hospital, the second oldest hospital in America maintained by private endowment. George the Third of England granted the hospital its

charter of incorporation on June 13, 1771, under the title of the Society of the Hospital in the City of New York in America. In 1810 the title was changed to The Society of the New York Hospital by an Act of the New York Legislature.

This hospital has the distinction of being the first institution in America devoted to the care of the sick to give organized instruction to its nursing personnel. It was in 1799 that Doctor Valentine Seaman, a scholarly man and prominent physician, organized a series of lectures combined with a course of practical instruction in the wards. This cannot be considered the beginning of the school, but it certainly formed the groundwork.

In June, 1927, The New York Hospital completed an association with Cornell University Medical College. Five years later they moved to their present location on York Avenue, between sixty-eighth and seventy-first streets. The increased facilities thus made available contributed to the progressive development of the school of nursing and it seemed only a natural consequence that on its sixty-fifth anniversary it became a unit in a great university.

The school is justly proud of its sixteen hundred graduates among whom are many who have nation-wide recognition for their outstanding contributions in the various fields of nursing.

REGISTRATION OF THE SCHOOL

The School of Nursing is registered by the Regents of the University of the State of New York and its graduates are eligible to take the state board examinations for license as registered professional nurses.

The school is accredited by the National League of Nursing Education which functions as the Department of Education of the American Nurses' Association.

The hospital is approved by the American College of Surgeons and is a member of the American Hospital Association. It is also approved for internships by the American Medical Association.

AIMS OF THE SCHOOL OF NURSING

Nursing offers a challenge to young women with exceptional personal and professional qualifications who are interested in social welfare. The aim of Cornell University-New York Hospital School of Nursing is to prepare carefully selected students in the fundamental principles of nursing in its various clinical aspects as applied to home, hospital, and other community services, with emphasis upon health teaching. The development of the individual student as a responsible member of civic and social life is a significant outcome of the program.

FACILITIES FOR THE SCHOOL

A special building for the school of nursing is adjacent to the hospital buildings. It provides adequate and well equipped class-rooms, laboratories, library, and recreation rooms as well as attractive and comfortable living accommodations for students and faculty.

Further necessary laboratory and library facilities are available through association with the Cornell University Medical College.

The clinical facilities of The New York Hospital are unsurpassed for the care and study of patients. The hospital with a capacity of over one thousand beds admits all types of patients including medical, surgical, obstetric, gynecological, pediatric, and psychiatric, and the out-patient department provides ample opportunity for the study of ambulatory patients.

Close cooperation with the Henry Street Visiting Nurse Service and other community agencies affords opportunities for observation in a community nursing program.

The social service department of The New York Hospital participates in the nursing course through the integration of social service in the program of study.

REQUIREMENTS FOR ADMISSION

A qualifying certificate from the Board of Regents of the State of New York is necessary for admission. The form for requesting this certificate will be sent an applicant

from the office of the Dean of the School of Nursing after application for admission to the school has been filed.

Requirements for admission include the satisfactory completion of two years of work in an accredited college. Students of unusual merit and promise who have less than the above requirements may be given special consideration.

The following units of study in an accredited high school or a recognized preparatory school are required:

English.....	4 units
History.....	1 unit
Civics.....	$\frac{1}{2}$ unit
Mathematics.....	2 units
Algebra.....	1 unit
Plane geometry.....	1 unit
Science.....	2 units
General science or biology...	1 unit
Chemistry.....	1 unit
Foreign language.....	3 units
Three units of one language or two units of each of two	
Electives.....	$3\frac{1}{2}$ units
<hr/>	
Total.....	16 units

It is recommended that prospective students include in their college program basic courses in general chemistry or inorganic and organic chemistry, zoology or biology, and the social sciences including psychology. Emphasis is placed upon scholarship of applicants. All students should review arithmetic prior to admission.

Besides these scholastic admission requirements applicants should be at least eighteen and not over thirty years of age and must present evidence of physical and personal fitness for nursing.

It is desirable that the applicant and her parent or guardian arrange for an interview with the Dean of the School of Nursing after formal application has been submitted. An appointment will be made upon request.

At their own expense applicants must also present a report from the Testing Service Division for Schools of

Nursing of the Psychological Corporation. Upon application to Cornell University-New York Hospital School of Nursing the card of application for admission to this examination will be forwarded to the applicant with necessary instructions.

The Admissions Committee takes into account all information received from these various sources in judging the suitability of an individual for admission to the school of nursing.

An applicant must deposit \$25.00 upon notification of acceptance for admission to the school. This deposit is credited toward fees payable on registration day but is not refundable if the applicant withdraws before that date.

All applications for admission should be addressed to the Dean, Cornell University-New York Hospital School of Nursing, 525 East Sixty-eighth Street, New York 21, New York.

(See "Calendar" for admission dates and last days for filing applications.)

CITIZENSHIP REQUIREMENTS

According to the law of New York State every person admitted to the examination for license as registered nurse in New York State at the termination of her course of study must submit evidence that she is a citizen of the United States or has declared her intention of becoming a citizen. Such a license shall terminate and become void at the end of seven years from such declaration of intention if the holder has not become a citizen.

ADVANCED STANDING

An applicant who has received her baccalaureate degree may have her time in the school reduced by two to six months if she maintains an average of B in theory and in practice throughout the course. Exemption must be requested during the last term of the second year.

UNITED STATES CADET NURSE CORPS

The United States Cadet Nurse Corps has been organized in an effort to meet the critical shortage in nursing services.

A unit of the Corps has been established in the school of nursing. Membership is voluntary and open to any student who is willing to agree to serve in military, governmental, or essential civilian nursing service until the end of hostilities.

Applicants who wish to be enrolled in the Cadet Nurse Corps must meet the same admission requirements as other applicants. After registering in the school they have the same rights and privileges as other students and are eligible for state registration.

Required fees and expenses will be paid through Federal funds for all students joining the Corps at least ninety days before the war ends. Their maintenance will be paid for the first six months. Thereafter maintenance is provided by the school. Corps members will receive Federal stipends at the rate of \$15.00 per month during the first nine months and \$20.00 per month from the tenth through the thirtieth month. From the thirty-first through the thirty-sixth month the hospital agrees to pay a stipend of \$30.00 per month.

Attractive outdoor uniforms are provided and a distinctive insignia will be worn on the indoor uniform.

Members of the Cadet Corps who withdraw from the school for personal reasons, and not upon the advice of the school faculty, will be required to refund all stipends and all money paid to the school on their behalf.

THE CURRICULUM

The three-year curriculum of the school of nursing is so planned as to give each student a thorough understanding of the basic sciences and principles underlying good nursing and of the best methods to use in the care of the sick, in the prevention of disease, and in health education.

The first and second years are divided into three terms each. The third year is divided into six terms and all formal teaching is completed in the first three terms. The last three terms are assigned to supervised practice in conformity with the requirements of the United States Public Health Service for those schools participating in the U. S. Cadet Nurse Corps program.

STUDENT CARES FOR CONVALESCENT PATIENT IN SOLARIUM

CONVALESCENT CHILDREN RECEIVE DIRECTION IN PLAY

During the first term and a half of the first year limited nursing practice is given in the pavilions of the hospital and the clinics of the out-patient department while a greater amount of time is spent in class and laboratory. In subsequent terms the student's nursing practice increases in length of time and in responsibility. A sequence is planned to include the various types of clinical services during day, evening, and night periods. An introduction to community nursing is provided in order that the student may acquire a more complete understanding of patients' needs.

During the clinical terms each student is scheduled forty-eight hours a week, which includes all class and nursing practice assignments.

SCHOLARSHIP REQUIREMENTS FOR PROMOTION AND GRADUATION

The established system of grading is the literal scale of F to A, with D as the lowest passing grade.

An average of C for a given term is required for promotion without condition. A grade of C is required in the course *Introduction to Nursing Arts*, and a grade of B in the course *Drugs and Solutions*. A grade below C in any clinical field of nursing practice or a term average which is less than C places a student on major warning. This must be removed by the end of the next term to insure further promotion. A student on major warning is ineligible to hold office in student organizations.

A grade of incomplete (I) is assigned if the work of a course is not completed because of illness or unavoidable absence and if, in the judgment of the instructor, the student has shown evidence that she can complete the course satisfactorily in a reasonable length of time.

A failure (F) in any given subject may necessitate withdrawal from the school unless the student's scholarship is exceptional in other respects, in which case repetition of the course may be recommended by the instructor.

A cumulative average of C for three years' work is required for graduation.

GENERAL ADMINISTRATIVE POLICIES

Cornell University-New York Hospital School of Nursing reserves the privilege of retaining in the school only those students who in the judgment of its faculty satisfy the requirements of scholarship, health, and personal suitability for the nursing profession.

It also reserves the prerogative of changing its curriculum, educational policies, and fees as deemed necessary for the progressive development of the school.

REGISTRATION AND ORIENTATION

First year students must be at the school not later than 10:00 a.m. on registration day. (See "Calendar" for exact date.)

A brief orientation program precedes formal instruction. During this time students have necessary physical examinations with Schick, Dick, and Mantoux tests, confer with faculty advisers, and secure uniforms, books, and other equipment.

DEGREE AND DIPLOMA

All students will receive a diploma in nursing from the Society of the New York Hospital upon satisfactory completion of the course. Those students who enter the school with at least two years of college work acceptable to Cornell University will be granted in addition the degree of Bachelor of Science in Nursing from the University.

THE GREEN DINING ROOM

STUDY IN THE LIBRARY

FEES *First Year*

MATRICULATION FEE.....	\$11.00	
ADMINISTRATION FEE.....	20.00	
TUITION FEE.....	100.00	
Payable at registration.....	\$75.00	
Payable at beginning of second term, first year.....	25.00	
LABORATORY FEE.....	25.00	
CHEMISTRY BREAKAGE (refundable if not used).....	5.00	
LIBRARY FEE.....	2.00	
HEALTH SERVICE FEE.....	10.00	
RENTAL LABORATORY COATS.....	1.00	
	<hr/>	\$174.00

Second Year

TUITION FEE.....	\$50.00	
LIBRARY FEE.....	1.50	
HEALTH SERVICE FEE.....	5.00	
	<hr/>	56.50

Third Year

TUITION FEE.....	\$50.00	
LIBRARY FEE.....	1.50	
HEALTH SERVICE FEE.....	5.00	
GRADUATION FEE—degree students.....	20.00	
(\$15.00 for diploma students)		
Payable at beginning of fifth term, third year. Refundable if student is not gradu- ated.		
RENTAL PUBLIC HEALTH UNIFORMS.....	1.50	
	<hr/>	78.00
GRAND TOTAL.....		<hr/> \$308.50

In addition to these fees students pay a Student Activity Fee of \$5.25 each year which is collected by the class treasurer.

MAINTENANCE AND GENERAL EXPENSES

The school of nursing provides maintenance and limited gratuitous care in case of illness. Each student is furnished with uniforms and caps which remain the property of the school.

The following estimated expenses must be met by the student:

	1st yr. 1st term	2nd yr.	3rd yr.	Optional
Uniform aprons, bibs, and accessories.....	\$26.00		\$3.00	
Uniform shoes.....	8.60		8.60	
Uniform sweater.....	4.25			
Uniform cape.....				\$15.00
Gymnasium suits.....	10.00			
Books, keys, bandage scissors, and miscellaneous supplies.....	30.00	\$5.00	5.00	10.00
Expenses for Public Health and other observations..	2.00	2.00	25.00	
	<hr/> \$80.85	<hr/> \$7.00	<hr/> \$41.60	<hr/> \$25.00

None of the aforementioned articles should be purchased before admission to the school. Students should be provided with an allowance for other personal needs determined by individual requirements. A list of limited necessary personal equipment will be sent each prospective student when accepted for admission. For the three-year course the total cost to the student should not exceed four hundred fifty dollars in addition to personal expenditures as determined by the student.

HEALTH REGULATIONS AND SERVICE

The school of nursing maintains a health service for its students. A well equipped infirmary with necessary staff is provided in the nurses' residence. A physical examination by the school physician with chest x-rays is required upon admission to the school and subsequent annual physical examinations will be given.

Vaccinations against typhoid fever and smallpox will be required of all students *before* admission to the school. Schick and Dick tests and immunization for positive reaction to the Schick test will be required of all students after admission to the school. Mantoux tests will be given during the pre-clinical period and for those who are negative will be repeated at regular intervals.

Gratuitous infirmary care for minor illnesses will be limited to four weeks at any one time in the case of all students. For more serious illnesses students will be cared for gratuitously in the hospital for not more than two weeks at any one time for the first-year students, and not more than four weeks at any one time for second and third year students. Expenses for special nursing care and special therapies must be borne by the student or her family.

VACATIONS AND OTHER ABSENCES

A vacation of four weeks is given in each of the first two years and two weeks in the third year. Students who have an exemption of time are not granted a vacation in the third year. All vacations are arranged to conform to the requirements of the educational program and the fields in which clinical practice is obtained.

As a result of absences the repetition of a course of study or special examinations may be required; class registration may be changed and in necessary instances nursing practice will have to be made up.

LOAN FUNDS

Student loan funds have been established for those who need financial aid and show promise in nursing. Application should be made in writing to the Dean of the School.

EXTRACURRICULAR OPPORTUNITIES

Believing that the education of young women today must include activities relating to healthful social relationships, generous provision for this development in the life of the student has been made.

The beautiful fireproof, sixteen-story residence, erected adjacent to the hospital buildings, is the center for these

activities. Every effort has been made in its construction and equipment to provide for the normal and healthy life of students and faculty.

Each of the eight student residence floors contains attractively furnished single bedrooms with lavatories, ample common baths, showers, and toilet facilities, a common sitting-room with adjoining kitchenette for informal gatherings, and a laundryette.

Comfortable lounges, reading, reception, and dining-rooms are on the first and ground floors.

For further recreational activities, a large, well equipped gymnasium, game-rooms, tennis courts, and porches are available. Arrangements for the use of an indoor swimming pool are made.

To insure the full benefit and proper use of these facilities, well-qualified instructors are appointed to direct the social and recreational activities of the school.

SCHOOL GOVERNMENT

The school of nursing has a cooperative government in which the students take an active part. A student organization has been established and functions with the Faculty Committee on Student Extracurricular Activities in all matters relating to social and professional conduct and discipline.

An annual student activities fee of \$5.25 is required and collected by each class.

Two or more hours a week of bedside instruction and individual conferences, which approximate a total of 244 hours, are included in practice assignments.

For Physical Education see Description of Courses.

DESCRIPTION OF COURSES

PRECLINICAL SCIENCES

100. Anatomy

This course includes both gross and microscopical anatomy. The gross anatomy is taught by lectures, demonstrations, and student dissection of the cadaver. The microscopical work is directly correlated with the gross dissection and includes a detailed study of prepared slides. Significant embryological information is included in the lectures.

60 Hours, First Year

Dr. Hinsey, Dr. Yntema, Dr. Hammond

101. Chemistry

A course designed to acquaint students with the fundamental principles of inorganic and physiological chemistry with special application to nursing practice. Studies in the general composition of the blood and urine, and in the digestion and utilization of foods are included. Lectures, recitations, demonstrations, and laboratory.

55 Hours, First Year

Dr. DuVigneaud, Miss Rynbergen,
Dr. Chandler, Mrs. Lee, Mrs. Young

102. Microbiology

The study of the habits and morphology of microorganisms emphasizing those of pathogenic character; sources, modes, and prevention of infection; disinfection and asepsis; the more important tissue changes occurring in the healing process, infections, and neoplasms; clinical microscopy of the blood and blood grouping; kidney function and urinalysis. Practical demonstrations and applications are made which relate directly to nursing. The blood group of each student is ascertained and recorded. Lectures, recitations, and laboratory.

68 Hours, First Year

Dr. Barr, Dr. Stillman, Miss Watson

103. Pharmacology and Therapeutics

A course designed to acquaint the student with the fundamental weights, measures, terms, and symbols used in the preparation and administration of drugs, common anti-septics, disinfectants, and other solutions. A study of important and commonly used drugs, their preparation, dosage, administration, physiological and therapeutic actions, idiosyncrasies, cumulative and minor toxic symptoms, antidotes and emergency treatments. Emphasis is placed on the accurate administration of drugs and the careful observation of their effects through supervised practice in nursing courses.

30 Hours, First Year
Dr. Cattell, Miss Daum

104. Physiology

This course is designed to give a basic understanding of the functions of the normal human body as an essential prerequisite to the study of health and nutrition and the pathological changes due to disease. Lectures, recitations, demonstrations, and laboratory.

48 Hours, First Year
Dr. DuBois, Miss Rynbergen,
Dr. Hitchcock, Dr. Müller, Mrs. Young.

MEDICAL NURSING

110. Medicine

Medical aspects of diseases are considered in these lectures and clinics. Material presented will supplement, emphasize, and interpret required reading covering etiology, sources of infection, symptomatology, usual course pathology, complications, treatment, prognosis, and prevention.

30 Hours, First Year
Dr. Barr and staff

111. Communicable Diseases

A study of communicable diseases, including tuberculosis. Special emphasis is placed upon etiology, modes of transmission, and prevention. Lectures and clinics.

22 Hours, First Year
Dr. Barr and staff

NUTRITION AND COOKERY CLASS

SURGICAL TECHNIQUE DEMONSTRATED TO FIRST-YEAR STUDENTS

112. Principles of Medical Nursing Including Communicable Disease Nursing

Through lectures, clinics, and demonstrations, students are taught principles and methods of nursing as applied to the care of medical patients. In the third year emphasis is placed upon managerial and teaching problems and the newer methods of treatment are presented.

30 Hours, First Year

8 Hours, Third Year

Miss Lyons

Miss Daum, Miss Fritz

113. Practice of Medical Nursing Including Communicable Disease Nursing

Supervised practice and study of the application of medical nursing principles and methods to the care of patients on the medical pavilions of the hospital. In addition students study and practice medical aseptic nursing as related to the care of patients suffering from communicable diseases including tuberculosis. Practice includes care of patients and managerial experience during day, evening, and night. Demonstrations and conferences.

1084 Hours, First, Second, and Third Years

(Includes 384 hours of communicable disease nursing)

Miss Lyons, Miss Daum, Miss Fritz, Miss Henderson, Miss Hills, Miss Lalime, Miss Vernstrom and staff

114. Practice in Care of Private Patients

Application of principles of medical and surgical nursing to the care of private patients.

192 Hours, Third Year

Miss Moffatt, Mrs. Miller and staff

NURSING

120. Orientation.

This course is designed to give the beginning student a general conception of the field of nursing; the responsibilities and obligations of each individual in choosing the profession; the importance of general conduct in building up the right habits of living and attitudes of the nurse. In-

cludes lectures in personal hygiene and personality study, emphasizing the importance of physical and mental health especially as it relates to the life of the nurse and is reflected in her work.

28 Hours, First Year

Miss Parker, Miss Kennedy, Miss Frost,
Dr. Doty, Dr. Tyndall, Miss McDermott

121. a. Introduction to Nursing Arts

A course designed to give the student a basic understanding of the principles of nursing with emphasis upon her attitude toward her patient, the existing social relationships, the physical requirements for the proper care of patients, and the procedures found most helpful for the promotion of health. Lectures and demonstrations.

118 Hours, First Year
Miss Stone

121. b. Practice of Elementary Nursing

The application of the theories of nursing in laboratory practice, in the surgical supply room, and in the actual care of convalescent patients in the pavilions and outpatient department of the hospital.

300 Hours, First Year
Miss Stone, Miss Zorn

122. History of Nursing

A survey of the historical development of nursing from its early conception to modern times. Lectures and panel discussions.

24 Hours, First Year
Miss Frost

123. Professional Adjustments I

A general consideration of fundamental ethical and philosophical principles and their application to problems which arise in the practice of nursing. An attempt is made to coordinate this course closely with each course of nursing practice through class discussions of pertinent problems. Lectures and conferences.

15 Hours, First Year
Miss Frost and Special Lecturers

124. Professional Adjustments II

Through a general survey of the nursing field, the student has an opportunity to learn the trends and advances in the profession; the need and opportunities for specialized preparation; the importance and types of legislation; the activities of professional organizations and the obligations of their members. Lectures and conferences.

15 Hours, Third Year

Miss Parker and Special Lecturers

125. Emergency Nursing

This course supplements the instruction in nursing and deals with the application of these principles to emergency situations in the home and community. Lectures and demonstrations. First Aid certificate granted by American Red Cross.

22 Hours, Third Year

Dr. Redden

See description of other courses in nursing relating to specific clinical fields.

NUTRITION

130. Nutrition and Cookery

An elementary course in normal adult nutrition and in food preparation. In addition, the nutrition requirements in childhood and in pregnancy are discussed during the student's practice on pediatric and obstetric services.

30 Hours, First Year

Miss Rynbergen, Mrs. Young

131. Diet Therapy

A course designed to present the underlying principles in treatment of disease by means of special dietaries; given concurrently with the lectures in Medical and Surgical Diseases. This course is supplemented by conference work during the student's practice on medical and surgical services. Lectures, recitations, and laboratory.

30 Hours, First Year

Miss Rynbergen, Mrs. Young

TENNIS IS A HEALTHFUL RECREATION

132. Practice of Diet Therapy

The application of the principles of diet therapy in supervised practice on the pavilions in the hospital. Conferences and case studies.

192 Hours, Second Year

Miss Gillam, Miss Rynbergen, Mrs. Young,
Miss Livingston, Miss Skinner

OBSTETRICS AND GYNECOLOGY

140. Obstetrics and Gynecology

This course deals with physiological and pathological changes during pregnancy, labor, and puerperium; the care of the normal newborn; the nutrition of the mother and baby; the prevention of complications; the social significance of infant and maternal mortality; the relation of obstetrics to various gynecological conditions; the results of infection and tumor growth and the required surgical interference and operative treatment. Lectures.

30 Hours, Second Year

Dr. Stander and staff
Miss Rynbergen

141. Principles of Obstetric and Gynecological Nursing

This course emphasizes the importance of prenatal instruction, observation, and care; infant, obstetric, and gynecological nursing procedure with particular attention to infections and their special therapy. Classes, demonstrations, and conferences.

30 Hours, Second Year

Miss Hickcox, Miss Boyle, Miss Darbois,
Miss Geuss, Miss Klein

142. Practice of Obstetric and Gynecological Nursing

Under supervised practice in the pavilions, nurseries, operating rooms, labor and delivery rooms, and outpatient department, students have the opportunity to

observe and care for infants and obstetric and gynecological patients. Nursing practice, case studies, and conferences.

698 Hours, Second Year

Miss Hickcox, Mrs. Bourgeois, Miss Darbois,
Miss Geuss, Miss Klein, Miss Walters and
staff

Miss Frost, Miss Boyle

PEDIATRICS

150. Pediatrics

This course emphasizes the influence of social, economic, and medical contributions on normal growth and development. Through a study of representative diseases of infancy and childhood, the resulting effects on morbidity and mortality are shown. Lectures and clinics.

30 Hours, Second Year

Dr. Levine and staff

151. Principles of Pediatric Nursing

The basic principles in the care of well and sick infants and children are given together with the social, educational, and nutritional aspects of their treatment and behavior as normal children. Classes, conferences, and demonstrations.

30 Hours, Second Year

Miss Schubert, Miss Ferguson, Mrs. Overholser,
Miss Rebentisch, Miss Woodfall and staff

152. Practice of Pediatric Nursing

This consists of supervised experience in aseptic nursing methods in the care of infants and children in the pavilion, formula laboratory, premature nursery, and out-patient department. Case studies and conferences.

698 Hours, Second Year

Miss Schubert, Miss Ferguson, Miss Kelly,
Miss Meigs, Miss Rebentisch, Miss Woodfall
and staff

Mrs. Overholser, Miss Correll

153. Development of Behavior in Children

A study of the normal child and his behavior. The susceptibility of the child's behavior responses to the various details of family life and of school will be emphasized. Lectures and recitations.

30 Hours, Second Year
Miss Whitley

PERSONAL HYGIENE AND PUBLIC HEALTH

Personal Hygiene

(8 hours—Included in 120. Orientation.)

160. Physical Education

Each student will be required to participate in regular physical exercise. This program is designed primarily to maintain positive health with emphasis upon posture and corrective measures and to stimulate sportsmanship.

64 Hours, Each Year
Miss McDermott and Miss Sawyer

161. Social and Economic Aspects of Health and Disease

This course attempts to relate the care of the patient in the hospital to the home and the community situation. Discussion of the nurse's part in the prevention of illness and the promotion of health. Lectures and conferences.

30 Hours, First Year
Miss Frost, Miss Soule

162. Family and Community Health

An introduction to the study of public health; local, state, and national services. In connection with field observations a brief survey of public health nursing is given; its development, aims, opportunities, requirements, and preparation. Lectures.

20 Hours, Third Year
Dr. Smillie, Miss Frost

163. Community Nursing Principles and Practice

Nursing practice in the out-patient department; visits of observation to community agencies; contact with the home through the social service department and public health nursing agencies in the community.

452 Hours, Third Year

Medical and Surgical Out-Patient Department

Miss Frost, Miss Reid, Miss Rolfe and staff

Social Service Department, Miss Soule and staff

84 Hours, Third Year

Observation, Henry Street Visiting Nurse Service

PSYCHIATRY

170. Psychiatry

A course of study designed to acquaint students with psychopathic conditions, their etiology, pathology, and treatment. Included in this course is an historical survey of psychiatry and the mental hygiene movement, a discussion of the problems most frequently found in the different periods of human development: nursery school age, pre-puberty, adolescent, climactic, and senile. An introduction to the techniques and social agencies available in helping people meet their problems.

30 Hours, Third Year

Dr. Diethelm and staff

171. Principles of Psychiatric Nursing

This course is organized to give students an understanding of the basic principles in the nursing care of personality disorders and the nursing procedures used in their treatment. Emphasis is placed also upon the relation of emotional disturbances to physical illness and of early development to future adult life. Lectures, demonstrations, and clinics.

30 Hours, Third Year

Miss Sprogell, Miss Corrigan, Miss Joinville,

Miss Lewis, Miss Noble and staff

172. a. Practice of Psychiatric Nursing

The application of the principles of psychiatric nursing through supervised practice in and conferences on the care of adults both in the in-patient and out-patient departments. Behavior studies and case studies. Two eight-weeks periods.

630 Hours, Third Year

Miss Sprogell, Miss Corrigan, Miss Joinville,
Miss Lewis, Miss Noble and staff

172. b. Special Therapeutics in Psychiatric Nursing

An opportunity is given the student for observation and practice in hydrotherapy, occupational and recreational therapies, with special emphasis on needs of the individual patient. Conferences and supervised practice.

70 Hours, Third Year, Second Period

Miss Spargo, Miss Brindle

PSYCHOLOGY

180. Elementary Psychology

An introduction to the study of human behavior and the underlying principles of mental adjustments and habit formation. An effort is made to apply this study to the student's own personality and give her a more scientific basis by which she can get a better understanding of the behavior of herself, her co-workers, and her patients. Lectures and recitations.

30 Hours, First Year

Miss Kennedy

181. Psychology of Deviate Behavior

A study of the deviations in behavior of adults and children, due to organic and sociological factors, and of the nursing care necessary in assisting patients in making more adequate adjustments during illness. The principles of mental hygiene are emphasized. Lectures and recitations.

15 Hours, First Year

Miss Kennedy

Development of Behavior in Children (See Pediatrics)

SURGICAL NURSING

190. Surgery

Surgical aspects of diseases are presented in these lectures and clinics. Factors determining the need for surgical interference are discussed and the major steps in the operation outlined. Special emphasis is placed upon signs, symptoms, and observations which should be made both preceding and following operation.

38 Hours, First Year
Dr. Heuer and staff

191. Principles of Surgical Nursing

Through lectures and demonstrations students are taught the principles and methods of surgical asepsis and the nursing of surgical patients. In the third year emphasis is placed upon managerial and teaching problems, and the newer methods of treatment are presented.

30 Hours, First Year
8 Hours, Third Year
Miss Lyons, Miss Fedder, Miss Harmon,
Miss Newton, Miss Sturtevant

192. Practice of Surgical Nursing

Supervised practice and study of the application of nursing principles to the care of patients on surgical pavilions of the hospital. Practice includes care of patients and managerial experience during the day, evening, and night. Demonstrations and conferences.

892 Hours, First and Third Years
Miss Lyons, Miss Fedder, Miss Harmon,
Miss Henderson, Miss Hills,
Miss Newton, Miss Sturtevant,
Miss Vernstrom and staff

193. Operative Technique

This course is designed to give the student a thorough understanding of surgical aseptic technique. It is planned to develop dexterity and intelligent response in assisting with operations and in meeting surgical emergencies. Experience is given in the general operating room and the gynecological operating room.

15 Hours, lectures, demonstrations, and conferences

359 Hours, practice, Second Year

Miss Lyons, Miss Haslup, Miss Gemski and staff
